RITA Specifications

For employees that worked or lived in at least one RITA municipality, employers are required to report for each employee every municipality for which tax was withheld or should have been withheld.

- RITA uses Position 5-9 of the RS record, referred to as the "Taxing Entity Code" field as defined by SSA. Since this field's length is 5 and the current municipality code is three numeric characters, prefix the municipality code with "R" (RITA) and a zero. Refer to the RS record example listed further down in this document.
 - **Note: This is a recent change. The prior layout used the letters "RO". The new layout is alpha and numeric, "R0".**
- RITA uses Position 338-412 of the RS record, referred to as the "Supplemental Data 1" field as defined by SSA. This field's length is 75 characters and should be the municipality name for which tax was withheld or was required to be withheld and should be left justified.
- RITA uses Position 413-487 of the RS record, referred to as the "Supplemental Data 2" field as defined by SSA. This field's length is 75 characters and should be the State name for which tax was withheld or was required to be withheld and should left justified.
- A separate RS record should be used for each municipality when an employer withholds for more than one municipality or for both workplace and residence tax.
